## Adaptation to the **REACH** European Regulation (**R**egistration, **E**valuation and **A**uthorisation of **C**hemicals)

The **REACH regulation (n.1907/2006)** regarding the registration, evaluation and authorisation of chemicals came into force, to all intents and purposes, on the 1st June 2007.

In compliance with the provisions of the REACH regulation, whoever manufactures a substance, or imports it from countries outside the EU, or if a substance is contained in a chemical preparation in a quantity which is equal to or more than a ton, it must be registered with the European Agency for Chemical Substances according to procedures and within different periods of time depending on the quantity produced and/or imported and on the dangerousness of the substance itself.

Therefore, with reference to what is provided for by the REACH Regulation, SAURO would like to declare that our Company neither produces nor imports chemical substances. However, because we use raw materials, we are collaborating with our suppliers in order to ensure that the REACH regulation is correctly applied.

## REACH European Regulation (Registration, Evaluation and Authorisation of Chemicals)

The **REACH Regulation (no. 1907/2006)** pertaining the Registration, Evaluation and Authorization of chemical substances has come fully into force on June 1st 2007.

The REACH Regulation requires all companies manufacturing or importing chemical substances into the European Union in quantities of one ton or more per year to register such substances with the European Chemicals Agency (ECHA) in Helsinki, Finland. As REACH applies to some substances contained in products (named 'articles' in REACH terminology), which must not be employed by any company importing goods into the European Union.

### SVHC list and attachments XVII and XIV

REACH also pertains the continuous use of chemical "substances of very high concern" (SVHC) and restricts their production, their commercialization, as well as their purpose in preparations and other articles, due to their potential severe consequences on health and the environment.

Sauro requires to all its suppliers that the substances appearing on the SVHC list and in attachments XVII and XIV, including their amendments and additions, possibly present in the materials supplied by them, are recorded in full compliance with the regulation.

Terminal blocks, connectors and PCB supports are not a substance or mixtures according to Regulation (EC) no. 1272/2008 on classification, labelling and packaging of substances and mixtures. The articles belong to the series MSD, MSDH, MTB, MTBH, MTS, MSB, MSBH, MSBD, MSG, MSGH, MSM, MSMH, MSS, MSQ, MSQH, MSP, MSPH, MPS, PSB, PSBH, PSM, PSQ, CLF, CTF, CKF, CSF, CXF, CIF, COF, CUF, CVF, CGM and CYF do contain following substances defined as SVHC in concentrations of more than 0.1% (w/w):

Substance	CAS #	Worst Case Concentration	Location in articles	Date of inclusion in SVHC
Lead	7439-92-1	30000 ppm	Copper alloy of the rising clamp	27.06.2018

The packaging and the article belong to the series MMP, MPP, MMT, MCCH, MCB, MCBH, MCBD, MCM, MCQ, CHF, CLM, CLMH, CBF, CTM, CTMH, CSM, CSMH, CIM, CIMH, COM, CPM, CPMH, CRM, CCF, CGF, CYM, STC, SMC and SRC do not contain any of the particularly alarming substances (SVHC) mentioned in the candidate list in concentrations of more than 0.1% (w/w), at the time of the revision date of this information sheet.

**The updated SVHC list is available on the ECHA web site, link follows:**
